WHEN THE LEATHER CONVEYS A STORY

QUANDO LA PELLE CUSTODISCE UNA STORIA

Architect Alberto and his wife Ezia, visionary founders of an architecture and design firm established in 1970 in Bergamo, began drawing refined decor elements for their home, always welcome to guests and friends. The visitor's enthusiasm for the creations of casa Pinetti lead to the inception, in 1983, of the company. When their two sons, architects Andrea and Lorenzo, joined the team of planners, the company began to evolve and expand, delivering collections globally and strengthening collaborations with international designers. The precious leather objects found themselves in the most exclusive residences, boutiques and hotels around the world. Among them an elegant wit pervades, they are imbued with a family heritage and with a way of life exquisitely Italian.

L'architetto Alberto e la moglie Ezia, visionari fondatori nel 1970 di uno studio di progettazione e architettura a Bergamo, iniziano disegnando raffinati elementi d'arredo per la loro casa, sempre aperta a ospiti e amici. L'entusiasmo degli invitati per le creazioni di casa Pinetti porta alla nascita, nel 1983, dell'azienda. Con l'ingresso dei figli Andrea e Lorenzo, entrambi architetti, il team di progettisti si evolve, realizzando collezioni su scala globale e stringendo collaborazioni con designer internazionali. I preziosi oggetti in pelle trovano casa nelle residenze, boutique e alberghi più esclusivi al mondo. Da loro traspare un animo elegante, intrisi dell'eredità di una famiglia e di un modo di vivere squisitamente italiano.

THE BEAUTY OF HERITAGE

LA BELLEZZA DEL PATRIMONIO

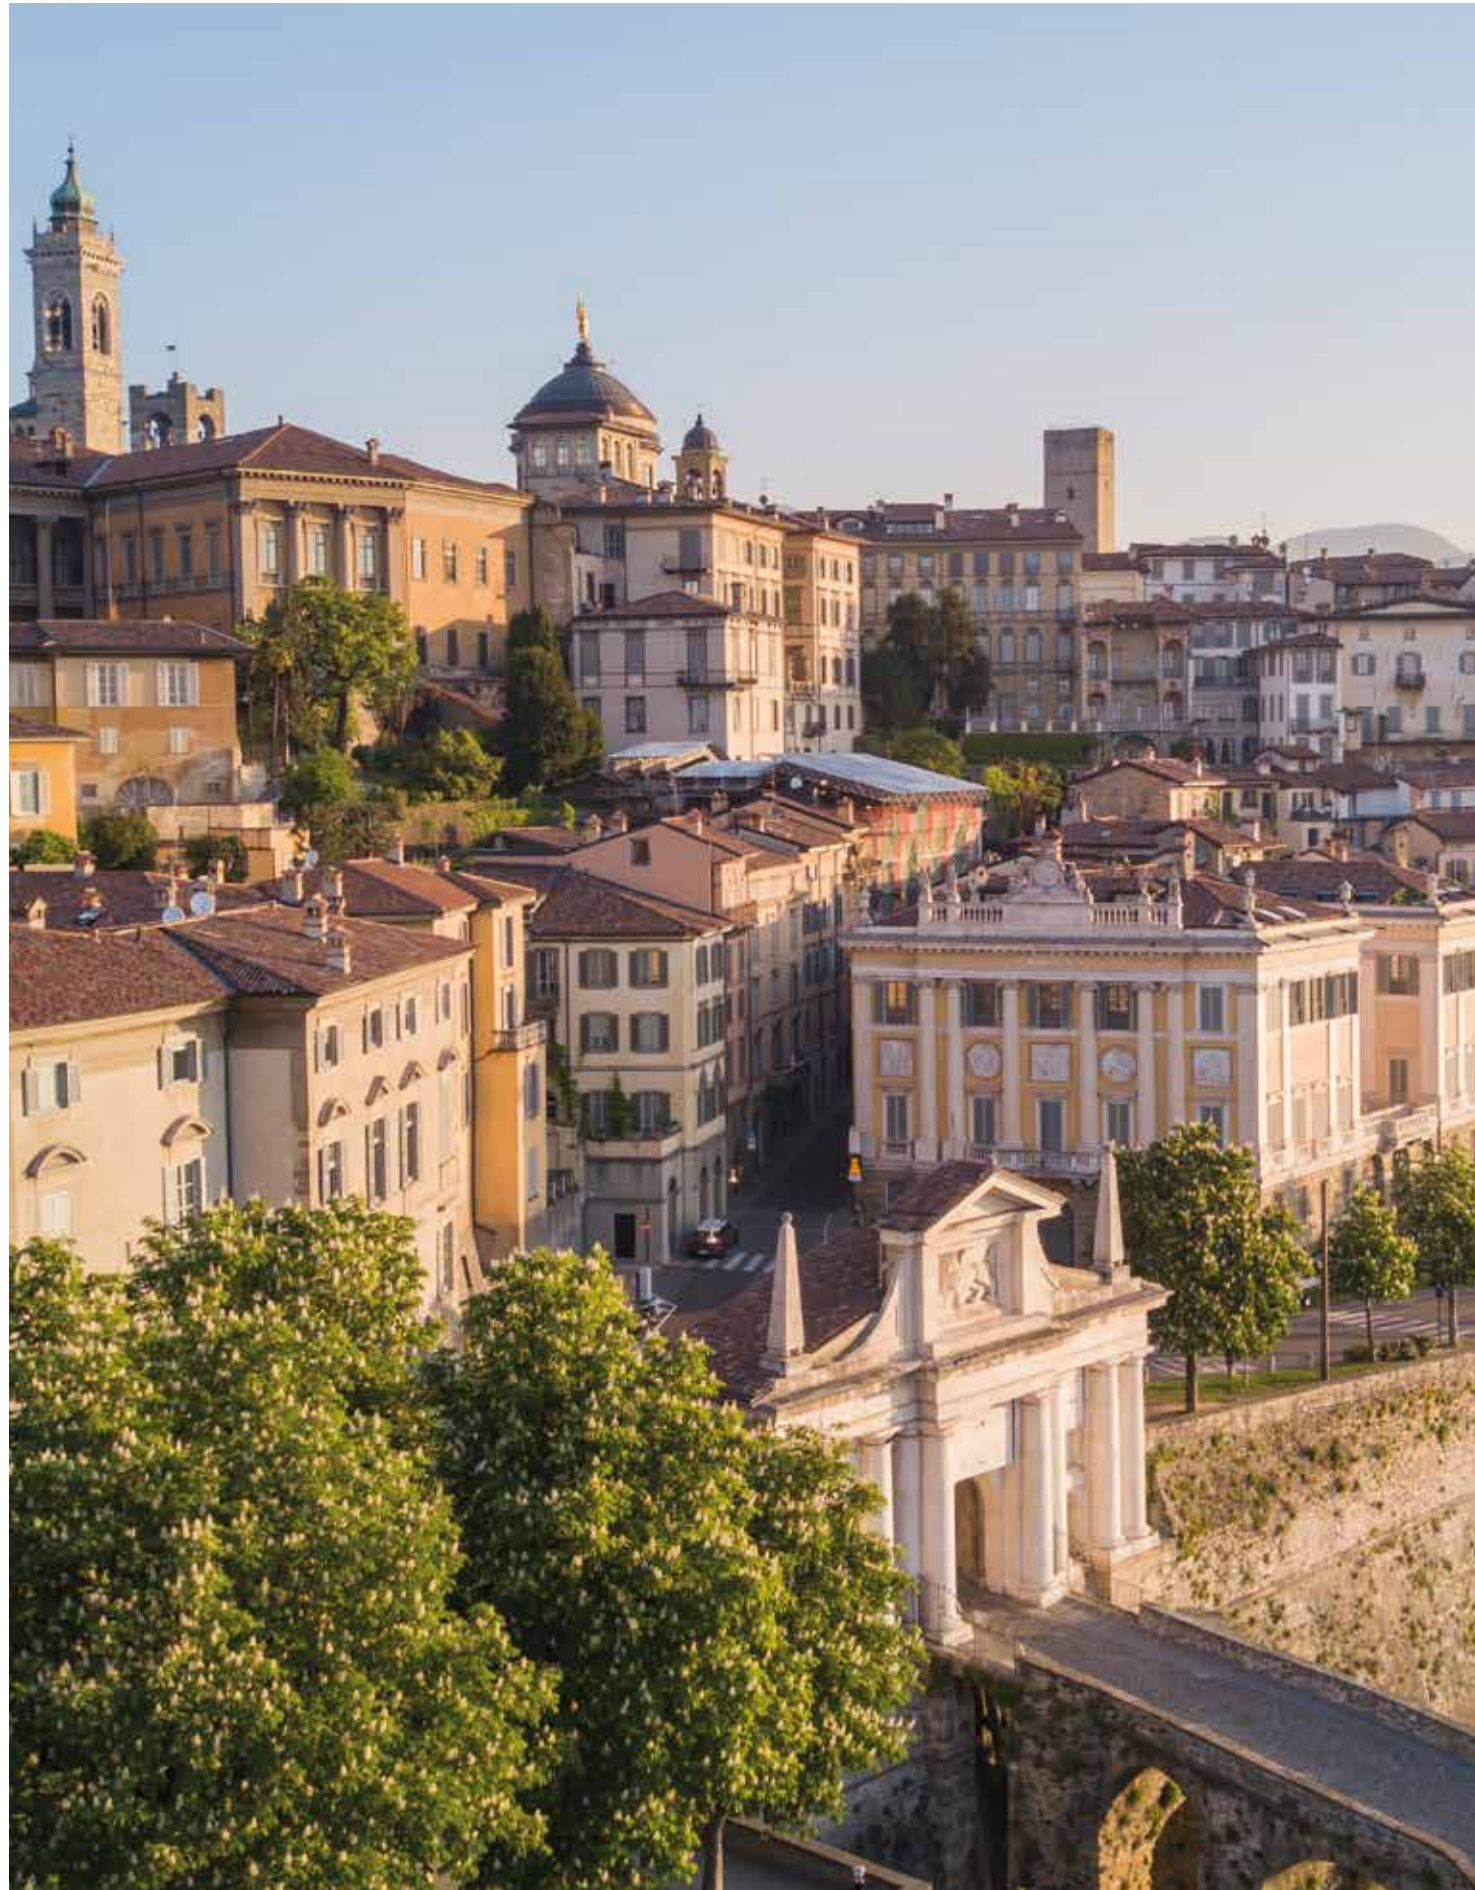

Italian artisan tradition has gleaned its sense of beauty and a well-made product from an artistic and cultural heritage of inestimable value, known and recognised even beyond its domestic borders. In this context swathed in excellence and an innate sense of aesthetic beauty, the Pinetti family brought their business and product idea to fruition, combining creative flair with technical skill, moving from a traditional take on culture understood to be a form of preservation and promotion of artisan manual skill and technique to an innovative one, in which culture plays an active role in growth and development. The concept of being "Made in Italy" is not just an abstract one that wants to capture a way of doing things; at Pinetti, representing the "made in Italy" idea is about tying together culture and innovation with an unbreakable bond.

La tradizione artigianale italiana trae il suo senso della bellezza da un patrimonio artistico e culturale di inestimabile valore, conosciuto e riconosciuto anche oltre i confini nazionali. In questo contesto, avvolto nell'eccellenza e in un senso innato di bellezza estetica, la famiglia Pinetti ha portato a compimento la propria idea imprenditoriale e di prodotto, combinando creatività e abilità, passando dal concetto tradizionale di conservazione e promozione di capacità manuale artigiana, ad una pratica innovativa in cui la cultura gioca un ruolo attivo nella crescita e nello sviluppo. Il concetto di essere "Made in Italy" non è solo astratto e vuole catturare un modo di fare le cose. Per Pinetti, rappresentare l'idea del "made in Italy" è legare cultura e innovazione con un legame indissolubile.

THE HISTORY OF AN ITALIAN FAMILY

LA STORIA DI UNA FAMIGLIA ITALIANA

Bergamo, 1983.

Alberto and his wife, Ezia, owners of an architecture practice, began designing and creating items for their home to satisfy a personal need. It wasn't long before these very items became part of a business project: Pinetti srl.

The company, with its strong artisanal influence, began creating one-off pieces such as clocks, trays and furnishing accessories, which immediately made their mark on the interior decoration market thanks to their rich designs and quality manufacturing.

In recent years, Alberto and Ezia's passion and skills have been passed on to their children, Lorenzo and Andrea, who have strengthened the international element of the company, bringing in new ideas and development models.

This is the family tale of a business which started out in Italy and has since grown, today telling its story around the world.

Bergamo, 1983.

Alberto, titolare di uno studio di architettura, e sua moglie Ezia iniziarono a progettare e creare articoli per la loro casa per soddisfare un bisogno personale. Non passò molto tempo prima che questi oggetti diventassero parte di un progetto imprenditoriale: Pinetti srl. L'azienda, con la sua forte influenza artigianale, iniziò a creare pezzi unici come orologi, vassoi e complementi d'arredo, che lasciarono immediatamente il segno nel mercato della decorazione d'interni grazie al loro design e alla manifattura di qualità.

Negli ultimi anni, la passione e le capacità di Alberto ed Ezia sono state tramandate ai figli, Lorenzo e Andrea, che hanno rafforzato l'elemento internazionale dell'azienda, apportando nuove idee e modelli di sviluppo.

Questa è la storia di una famiglia che ha avuto inizio in Italia e da allora è cresciuta. Oggi racconta la propria storia in tutto il mondo.

This is the journey we have chosen and continue to pursue, and we want to share it with you all, both those who are already familiar with Pinetti and those discovering it for the first time.

'Inside Pinetti' è un viaggio alla scoperta dell'eccellenza italiana, attraverso la storia di una famiglia e di un'azienda che, molti anni fa, sono diventate la stessa cosa. BORN AND BRED IN PINETTI

NATO E CRESCIUTO IN PINETTI

Pinetti's story is one of company growth, of being open to new challenges from the outset, challenges which propelled it to become a brand name.

Each and every object is the result of a wealth of skills and values which are vital for keeping the company's creative and productive cogs turning – a concept just as valid today as it was at the start.

The very same designers and project partners that collaborate on Pinetti designs come to us in-house, to follow every step of the product creation process, working alongside our experts and internal staff. Seeing up close how a design translates into a product and how an idea turns into something tangible allows you to really go 'Inside Pinetti' and appreciate what makes this company different.

La storia di Pinetti è quella di una crescita aziendale, aperta a nuove sfide fin dall'inizio, sfide che l'hanno spinto, a diventare un marchio.

Ogni oggetto è il risultato di un patrimonio di abilità e valori che sono vitali per far girare gli ingranaggi creativi e produttivi dell'azienda, un concetto altrettanto valido oggi come lo era all'inizio. Gli stessi designer e partner di progetto che collaborano con Pinetti vengono in azienda, per seguire ogni fase del processo di creazione del prodotto, collaborando con i nostri esperti e lo staff interno.

Vedere da vicino come un progetto si traduce in un prodotto e come un'idea si trasforma in qualcosa di tangibile permette di andare veramente "All'interno di Pinetti" e apprezzare ciò che rende questa azienda diversa.

ON-DEMAND PRODUCTION BETWEEN TRADITION AND INNOVATION

PRODUZIONE SU MISURA
TRA TRADIZIONE ED INNOVAZIONE

When Italian artisanship is amended by the precision of avant-garde technologies, the results become remarkable. From the specific choosing of raw materials to the final touches, everything concurs to the materialization of a unique product, incomparable. Excelling thanks to the quality of the materials used leather, wood, paper, eco leather and metal are derived from Italy, sourced and produced in ethical and sustainable ways. Every collection is conceived and developed under the eyes of skillful experts so as to maintain control in every phase of the creative process; from the first sketches on paper to the cut of the leather, from the insight to the product's form.

Made-to-measure technology, combined with computerised processes, ensure we are able to satisfy each and every request, guarantee complete flexibility when it comes to prototyping and creating new products, and take care of even the finest details.

Quando l'artigianalità italiana è perfezionata dalla precisione di tecnologie all'avanguardia i risultati diventano ineccepibili. Dalla scelta delle materie prime alla cura per le finiture, tutto concorre alla realizzazione di un prodotto unico, inimitabile. Eccellere grazie alla qualità dei materiali: pelle, legno, carta, eco-ouoio e metallo di origine italiana, prodotti in modo etico e sostenibile. Ogni collezione nasce e si sviluppa sotto gli occhi di abili professionisti, così da consentire il controllo su tutte le fasi del processo creativo; dai primi schizzi su carta al taglio della pelle, dall'intuizione alla forma.

La tecnologia su misura, unita a processi computerizzati, ci consente di soddisfare ogni singola richiesta, garantire la massima flessibilità quando si tratta di prototipare e creare nuovi prodotti e di curare anche i dettagli più ricercati.

A JOURNEY THROUGH MATERIALS

UN VIAGGIO ATTRAVERSO I MATERIALI

Research, study, careful selection and treatment: we know our materials inside out, from wood to glass, stone to metal, and leather to fabric, guaranteeing unique, original creations.

Ricerca, studio, selezione e trattamento accurato: conosciamo i nostri materiali, dal legno al vetro, dalla pietra al metallo, dalla pelle al tessuto, garantendo creazioni uniche e originali.

GUARANTEED NEW LIFE TO LEFTOVERS

GARANTIAMO UNA NUOVA VITA AGLI SCARTI

Where everyone saw a gap, we found a resource. Since the beginning of our journey in the 80s, our focus has been paid to the methods of reusing excess leather.

Hence the decision to introduce the Antibes material, this technical material is made from 80% milled vegetal tanned leather. Combined with a percentage of natural latex, natural fats and water.

The result is a very high quality regenerated leather which is water and UV resistant.

Dove tutti videro uno scarto, noi trovammo una risorsa. Sin dall'inizio del nostro percorso negli anni '80, l'attenzione fu riposta nei metodi di riutilizzo delle pelli di scarto delle concerie.

Da qui la scelta di introdurre il materiale Antibes, un materiale tecnico prodotto dall'80% di scarti di cuoio conciato al vegetale, macinati, mischiati con una percentuale di gomma naturale, grassi naturali ed acqua. Il risultato è un cuoio rigenerato di alta qualità, idrorepellente e resistente ai raggi UV.
